	Post-Doctoral	-----	-----	-----	-----
	Title of the Ph.D.	Riverbank Erosion and Migration in the Brahmaputra Valley of Assam: A Case Study of two Districts			
	Salient features of Ph.D. (in 100 words)	The study mainly examined and discourses the interlinkages between riverbank erosion and migration on the basis of field level data. With this, the study also explores the various socioeconomic issues arise in the Brahmaputra valley of Assam due to riverbank erosion. Based on primary data, the study found that riverbank erosion is a major factor driving short-and long-term migration among farmers in affected villages. Therefore, the study recommended that policies of resettlement and social safety nets should be implemented for the benefit of the affected people control migration.			

3.	Research Experience
